

**IN THE UNITED STATES DISTRICT COURT
FOR THE NORTHERN DISTRICT OF MISSISSIPPI
GREENVILLE DIVISION**

MICHAEL AMOS, et al.

PLAINTIFFS

VS.

CIVIL ACTION NO. 4:20-CV-07-DMB-JMV

TOMMY TAYLOR, et al.

DEFENDANTS

DECLARATION OF JEWORSKI MALLET

Pursuant to 28 U.S.C. § 1746, I, Jeworski Mallett, declare under penalty of perjury that the following statements, based on my personal knowledge, are true:

1. I am an adult resident citizen of Ridgeland, Mississippi. I am competent to testify to the matters contained in this Declaration, and I give this Declaration voluntarily.
2. I have been employed by MDOC since September 2001. I am currently serving as the Mississippi Department of Corrections (“MDOC”) Deputy Commissioner of Institutions (“DCI”). I was appointed acting Deputy Commissioner on January 15, 2020, and my role as DCI became permanent on February 1, 2020.
3. In my position as DCI, I am responsible for, among other things, evaluating and improving security procedures, conditions of confinement, and support services for MDOC correctional facilities, including at the Mississippi State Penitentiary at Parchman (“MSP”). I report directly to the MDOC Commissioner, Mr. Burl Cain.
4. I visit MSP regularly. I have general personal knowledge of the present conditions of confinement at MSP, including but not limited to staffing of correctional officers, security and safety protocols, food services, medical care, cleaning requirements, and general operations.

EXHIBIT

1

5. As has been widely reported, there was a gang-related disruption within MDOC correctional facilities in late December 2019 and early January 2019, before I was appointed as DCI. That disruption also impacted MSP, resulting in increased inmate-on-inmate violence and lockdowns at MSP during the following days and weeks. The disruption resulted in five inmate deaths at MSP, each of which was caused by stabbings or blunt force injuries by other inmates. That disruption was unfortunate, but it was not a normal occurrence within MDOC or at MSP. It was an aberration. MSP has not experienced a homicide since January 21, 2020.

6. Since the disruption, MDOC has made significant, calculated movements to stabilize MSP and improve the conditions of confinement at MSP. MDOC's efforts to better the conditions of confinement at MSP are ongoing and continuous.

7. I have reviewed the allegations in Plaintiffs' Memorandum in Support of their Supplemental Emergency Motion for TRO and Preliminary Injunction and the exhibits submitted by Plaintiffs in connection with the same, including but not limited to Plaintiffs' photographs, declarations, and expert reports from Eldon Vail, Dr. Marc Stern, Dr. Craig Haney, Debra Graham, Madeleine LaMarre, and Frank Edwards. It is my understanding that Plaintiffs' allegations and expert reports are based on alleged conditions that existed during their inspection of MSP on February 12 and February 13, 2020. Those conditions have changed significantly in the past five months.

8. I personally attended the June 24, 2020 inspection of MSP, which was attended by MDOC's experts, Defendants' counsel, and Plaintiffs' counsel. I have reviewed photographs taken during the June 24, 2020 inspection, which are attached as Exhibit 5 to Defendants' Response in Opposition to Plaintiffs' Supplemental Emergency Motion for TRO and Preliminary Injunction ("Defendants' Response"). Based on my personal knowledge, the photographs

attached as Exhibit 5 to Defendants' Response are a true and accurate representation of the conditions that existed at MSP on June 24, 2020.

9. It is my opinion that Plaintiffs' allegations and expert submissions are based on outdated evidence that does not reflect the present conditions at MSP or the substantial improvements MDOC has made at MSP over the last five months, which include:

- Appointment of Burl Cain as MDOC Commissioner – In June 2020, Governor Reeves appointed Burl Cain, former warden at the Louisiana State Penitentiary, to be Commissioner of MDOC. I am aware of the significant plans that Commissioner Cain has for improving safety and conditions at MSP and all MDOC facilities, many of which are already underway and are described below. Among other things, Commissioner Cain has already: increased authority of MSP's Superintendent so that he can quickly address a broader range of potential problems; begun developing plans for bettering the inmate-to-office ratio at MSP, including by using inter- and intra-facility transfers and increasing hiring incentives for security officers; hired three new chaplains at MSP to assist with counseling; begun conducting a complete review of MSP's food operations; started working to institute additional educational vocational opportunities for inmates at MSP; started establishing video visitation for MSP inmates so that they can better communicate with their families; and required betterment of many structural issues at MSP.
- Plans to Restore ACA Accreditation – Commissioner Cain has made accreditation with the American Correctional Association ("ACA") a central goal for MSP. The ACA is an organization that sets standards and monitors compliance of correctional institutions across the country. In 2015, and in years prior, MSP was an ACA-accredited facility. Although former MDOC commissioners permitted MSP's ACA accreditation to lapse, Commissioner Cain's goal is to obtain ACA accreditation by July 2022. To that end, Commissioner Cain has already reassigned one executive staff member because of concerns that the staff member was not moving swiftly enough to achieve ACA accreditation and to make related improvements at MSP.
- Appointment of Timothy Morris as Acting MSP Superintendent – MSP's former Superintendent, Marshall Turner, exercised his option to retire in April 2020, making room for the appointment of Warden Timothy Morris as the new acting Superintendent of MSP. MDOC expects Mr. Morris to institute improvements at MSP to aid in achieving ACA accreditation. Commissioner Cain has already expanded the role and authority of MSP's Superintendent to include authority over maintenance, classification, and investigations. Providing broader authority to MSP's Superintendent should improve response times for maintenance, security, and other issues.
- Inmate Transfers – Since the end of the gang disruption in January 2020, MDOC has transferred more than 1,600 inmates out of MSP, including nearly 800 from Unit 29 and more than 300 from Unit 30. Those transfers were made in order to close parts of Unit 29

and to bring the officer-to-inmate ratio at MSP into compliance with ACA standards. The transfers has also facilitated accelerated repairs and structural improvements at MSP.

- Closure of, and Improvements to, Unit 29 Buildings – Following the noted transfer of inmates, MSP closed six of the 12 buildings in Unit 29. Closing those buildings allowed MSP to focus its security officers on the remaining buildings, bettering the inmate-to-officer ratio. In addition, MSP is currently repairing and renovating Building C of Unit 29 so that it can be used to house inmates who currently reside in Building F of Unit 29. MDOC will ensure that the required independent health and safety inspections are conducted for Building C of Unit 29 before it is occupied. After the inmates are transferred to Building C, MDOC will close Building F. The repairs and transfers are expected to be completed in three months.
- Hiring Efforts and Improvements – Commissioner Cain has instituted new hiring measures for security officers at MSP. Officers can now be hired and placed on MDOC's payroll the day that they are interviewed, removing the time lag that previously existed. Prior to this change, applicants were required to obtain and pay for their own physical after their interview, and then MDOC evaluated them for a period of time before hiring them, which could be a lengthy process. Applicants are now hired, put on payroll, and then evaluated by MDOC while in training. This allows MDOC to fill vacant officer positions faster with qualified candidates who prove themselves through training.

MDOC also raised pay for correctional officers by \$1,500 per year, bringing the total salary to approximately \$27,000 per year, plus an approximate \$12,000 per year in benefits, bringing the total compensation package to \$39,000 per year.

MDOC is also now promoting premium pay for Emergency Response, tactical, and K-9 teams, with built-in overtime for longer shifts, and shift-differential pay. Commissioner Cain has approved renovation of ten houses on MSP grounds where certain officers must live so that they can respond faster to institutional emergencies.

These efforts have already produced results. MDOC recently hired 11 additional security officers for MSP, and from June 2020 to July 2020, MDOC doubled the total number of officers enrolled in its training academy. Also, Commissioner Cain filled three vacant chaplain positions for MSP, each of whom will be living on MSP grounds and are expected to improve counseling services, inmate quality of life, and rehabilitation.

Due to the transfer of inmates out of MSP, the closure of buildings in Unit 29, and increased hiring efforts, MSP's current officer to inmate ratio is in compliance with ACA standards, including those that require MDOC to evaluate staffing needs on an ongoing basis to ensure inmates have access to programs and services. As of June 24, 2020, there are 2,052 inmates at MSP and 222 officers. *See* MSP Bed Capacity and Filled Correctional Officer Positions attached as Exhibit A.

- Staffing Analysis – MDOC is currently contracting with an industry expert to perform staffing analyses of MSP and other MDOC facilities, consistent with ACA standards.

MSP's staffing analysis is being conducted by former President of the ACA and Secretary of the Department of Public Safety and Corrections in Louisiana, Mr. Richard Stalder. The staffing analysis will evaluate the current prison population and facilities to determine how many correctional officers are needed in various capacities at MSP to operate the prison most efficiently and safely. The analysis will take into account the new security measures at MSP, including addition of cameras as discussed below.

- Evaluation of Current Classification System – MDOC is also currently contracting with an industry expert to evaluate MDOC's inmate classification system at all facilities, including MSP. The evaluation will be performed by Dr. James Austin, with the JFA Institute. Dr. Austin's evaluation of MDOC's classification system will include a comprehensive reliability and validity test and will recommend revisions to the classification system, assessment forms, instrument refinement, and system modification.
- Decreased Inmate Violence – Incidents of inmate violence at MSP have decreased since the gang disturbance in January 2020. There have been no deaths at MSP caused by inmate violence since January 2020. All inmate deaths at MSP from February 2020 to present were determined by autopsy to be the result of natural causes. Also, there were eleven assaults with weapons by inmates at MSP in January, two in February, one in March, and one in April. There were zero inmate assaults with a weapon in May. *See* MSP Combined Monthly Report attached as Exhibit B.
- Increase in Confiscations – I am personally aware of the significant efforts by MSP to increase confiscation of contraband by performing more shakedowns of inmates, common areas, and housing units. While MSP confiscated only 97 items of contraband in January 2020 and 95 items in February, MSP confiscated 948 items of contraband in April and 1382 items in May. *See id.*
- Cameras – Under Commissioner Cain's direction, MDOC will spend one million dollars to add cameras at MSP and other MDOC facilities. The cameras will be strategically installed in every unit where inmates are housed. The cameras will increase security by decreasing the number of officers required to monitor units so that more officers can be deployed to respond to emergency situations or to perform other functions. The cameras will be monitored 24 hours a day, 7 days a week.
- Cessation of Lockdown – MSP was placed on lockdown status to protect inmates and officers from violence following the noted gang disturbance. MDOC lifted MSP's institution-wide lockdown on February 14, 2020; however, Unit 29 and Unit 30, Building B, remained on lockdown until March 8, 2020, in order to facilitate investigations of inmate deaths and to coordinate the safe transfer of inmates from Unit 29. Since then, MSP has remained off lockdown with very limited exceptions. Based on my review of the allegations in Plaintiffs' Memorandum and expert submissions, it seems that Plaintiffs improperly assume that lockdown conditions continue at MSP. They do not.

- Budget Allocation for June 2020 to June 2021 Fiscal Year – MDOC succeeded in retaining approximately the same funding for this fiscal year that it had last fiscal year. That is considered a success given that the State is currently operating within an overall deficit budget. For this fiscal year, MDOC's general fund budget is \$310,898,986, and the special fund budget is \$27,228,952. MDOC will use the available funds to better conditions of confinement at MSP.
- Rehabilitation – Commissioner Cain is instituting policies at MDOC that were successful in Louisiana for improving inmate rehabilitation and decreasing violence. In addition to hiring three chaplains and approving the use of approximately 30 inmate preachers for counseling and stress reduction, MDOC is working with Mississippi Prison Industries to institute new vocational and reentry programs for MSP inmates. To coordinate those efforts, on July 8, 2020, MDOC hired Mr. Gary Young as Deputy Commissioner of Reentry. Commissioner Cain plans to bring back the rodeo at MSP and is working to create new inmate clubs and organizations at MSP. In recent weeks, MDOC installed larger televisions in the housing units at MSP and allocated funds to create video visitation, telecommunications, and tele-learning systems. Inmates will be able to visit with their loved ones and resume program/treatment initiatives using video technology.
- Repairs and Improvements to Facilities – Defendants have mounted a significant and continued campaign to improve and repair the conditions at MSP. *See* App'x I to Sprayberry Declaration. The extensive repairs are well-documented. Since February, Defendants have repaired roofs, showers, and bathrooms. MSP has replaced two of its six sewage/wastewater lift stations, and has plans and funding to replace the rest. MSP has awarded contracts for housing roof improvements. MSP is adding four new, industrial-sized fans to each building, including in Units 29 and 30. MDOC has also set aside funds to complete a full renovation of the bathrooms in Unit 30, a general population housing unit. The renovations will be consistent with ACA standards.
- Improved Communication with Centurion – In part as a result of personnel changes, including MSP's new Acting Superintendent and Centurion's new Medical Director at MSP, communication and cooperation between MSP officials and Centurion personnel have improved. Among other things, the increased cooperation has led to more efficient and timely transport of inmates to and from the medical units at MSP, responses to sick call requests, and provision of inmate medications.

10. In addition to the noted improvements at MSP, the following are my personal observations regarding the veracity of certain allegations contained in Plaintiffs' Memorandum in Support of their Supplemental Emergency Motion and expert submissions.

- Inmate Violence – Since January 2020, MDOC has devoted substantial time and resources to preventing inmate-on-inmate violence. As noted, these measures include: appointing new key personnel, including Commissioner Burl Cain; transferring approximately 1600 inmates out of MSP, including 800 inmates from Unit 29 and 300

from Unit 30; closing six buildings in Unit 29; transferring inmates within MSP after reclassifying them; screening and terminating existing officers; training and supervising new officers; contracting with industry experts to perform staffing analyses and to evaluate MDOC's classification system; increasing recruitment and hiring efforts for officers; enforcing policies that ensure officers report for duty; increasing superintendent authority; increasing confiscation of contraband; and hiring chaplains and others to reduce inmate stress. The numbers do not lie – the above efforts have worked to significantly decrease inmate violence at MSP. *See* Ex. B.

- Staffing Levels – Due to the transfers and moves, inmate-to-officer ratios are currently in substantial compliance with ACA standards at MSP. *See* Ex. A. These changes have contributed to reducing inmate violence.
- Correctional Officer Presence in Units – Correctional Supervisors and officers perform inmate counts every two hours from 7:00 am until 11:00 pm and every hour from midnight until 6:00 a.m. Officers perform security checks on inmates in segregation—which includes some inmates in Unit 29—every thirty minutes. For non-segregation units, such as Unit 30, security checks are performed at shift change and at random times throughout the day. Shotguns are not used in security checks. They have been used only in extraordinary situations, such as during the gang disruptions, and then only non-lethal ammunition is used as a means of controlling the disruption. Officers may use shotguns to fire such non-lethal rounds (such as rubber bullets) only as a last resort after exhausting all lower levels of force. Shotguns are no longer allowed in housing units and any prior practice of the same that might have existed has been disbanded. While some units require an officer in the towers all day, other units do not. The staffing analysis being performed by Mr. Stalder will aid MSP in determining the proper use of officers to maximize inmate safety. Cameras which are being added to MSP will also eliminate the need to position officers in towers at all times within general population settings.
- Use of Floor Walkers – I am not aware of any floor walkers exercising any level of authority over inmates. Floor walkers are required to be supervised by correctional officers when they are on a zone. They are checked for contraband when entering and exiting a zone. Floor walkers perform very valuable functions at MSP in segregation housing units. They improve inmate quality of life, clean common areas outside cells, and, importantly, they aid in the prevention of inmate suicides.
- Clean Facilities – Following the outbreak of COVID-19, MDOC thoroughly deep cleaned and sanitized all areas of MSP and has continued to do so on a regular basis. Inmates are provided adequate amounts of cleaning supplies such that they can clean their own cells. MSP uses PortionPac materials, which are state of the art cleaning chemicals that are designed exclusively for the correctional industry. These materials are non-toxic and are adequate for cleaning of MSP.
- Rodents and Insects – There is no visible rodent or insect infestation at MSP. While rodents and insects can be expected in rural areas such as the area surrounding MSP, MDOC employs a licensed pest control applicator who provides pest control services at

MSP three days a week. MSP was treated for pests as recently as July 10, 2020. I have personally never seen a rodent in an inmate housing area at MSP.

- Inmate Hygiene – Inmates are currently being provided adequate soap, towels, toothbrushes, toothpaste, combs, brushes, and safety shaving razors. Inmates are provided three sets of clothes every six months, not one set of clothes as Plaintiffs’ experts allege. A major cause of inmates’ complaints of not having sufficient clothes is that they intentionally destroy their own clothing. Numerous sets of clothing were found in the plumbing system where inmates had flushed items down their toilets. *See* Photographs attached as Exhibit C. Nonetheless, all inmates at Unit 29 have received a new issuance of clothing within the last two months.
- Laundry – MSP’s current policies prohibit inmates from washing their laundry in sinks or toilets. Again, issues with laundry often arise from inmate destruction of their own clothes. MSP has a central laundry with two very large industrial sized washers and dryers that adequately supplies MSP with clean laundry and linens. In addition, MDOC recently purchased three additional industrial washers and three additional dryers for MSP, which should be arriving soon to add additional laundry resources.
- Sinks, Showers, and Toilets – Repair and improvement of sinks, showers, and toilets, most of which are intentionally damaged by inmates, have been a major focus of MDOC’s continued, ongoing effort to repair and improve all facilities at MSP. MSP’s maintenance crews prioritize repair of bathroom facilities. I am not aware of any showers at MSP that do not have hot water. MDOC has approved appropriations for a complete renovation of all of Unit 30’s bathrooms. Plaintiffs’ assertion that excrement is regularly being left in toilets at MSP is misleading. *See* [Doc. 101-3], Graham, at p. 25 ¶ 6. Ms. Graham’s claims and evidence that excrement is left in toilets is based on her observations of Unit 32, a unit that is no longer in service and was abandoned prior to the experts’ February 2020 inspection. I am not personally aware that excrement is routinely left in toilets at MSP in units where inmates are actually housed on a daily basis.
- Lights – MDOC has substantially improved the conditions of the lights in MSP. In Unit 30, MDOC has installed new tamper-resistant lighting that has substantially improved visibility. In Unit 29, lights are continually repaired as soon as possible after inmate destruction or as routine maintenance, and MDOC has begun installing more, new tamper-resistant light fixtures there as well.
- Exposed Wires – MDOC has made substantial efforts to repair exposed electrical wiring at MSP. Inmates at MSP continually destroy electrical components and lighting fixtures and expose wires in an attempt to charge and power unauthorized electronic devices. MDOC’s effort to timely repair exposed electrical wiring is continuous and ongoing.
- Roof and Window Leaks – Over the last five months, MDOC has made an extensive, continued effort to repair the roofs over MSP housing units and to address other areas of alleged water intrusion at MSP. Due to that effort, I am not currently aware of any active

leaks or areas of water intrusion in any of the areas where Plaintiffs are housed. MDOC has chosen professionals to complete further roof improvements, including adding additional insulation that will help regulate temperatures within the units.

- Mold – Contrary to the allegations that mold is widespread at MSP, I am aware of no test, investigation, or study that has confirmed the existence of mold anywhere at MSP. During the recent June inspection of MSP, including all of the buildings where named Plaintiffs are housed, I did not observe mold.
- Food – MSP contracts with an outside vendor to provide food services. Based on my review of information from MSP’s food vendor, I understand that inmate meals meet the required caloric and nutritional standards. I am not aware of any credible evidence that feces, insects, or other foreign objects are found in inmates’ food. Commissioner Cain has instituted measures to ensure that the food at MSP is not only adequate but is also appetizing. I personally eat the food at MSP. I am aware that during the previous lockdowns in some segregation housing units, inmates were fed in their living areas. During that time, inmates would sometimes keep their food trays with them in their cells, rather than return them. Keeping these trays in their living areas is a health and sanitation issue and has been addressed. Dining facilities are being utilized more now, and all trays are retrieved immediately after feeding.
- Water – I am aware of no recent test that has found the existence of any harmful contaminants in MSP’s water system. I am aware that the tests conducted by Plaintiffs’ experts confirm that there are no contaminants in the water in Units 26, 29, 30, and 32. All officers, staff, and administrators drink the same water as the inmates at MSP.
- Temperature – There are operational heating units in all housing areas at MSP, but there is not an “air conditioning” system in every housing area. That is, there are not air cooling systems in every building, including not in Unit 29 and Unit 30. Instead, there are operational, industrial-sized fans, which are routinely monitored by MDOC and repaired or replaced as necessary. MSP is already installing two additional new industrial-sized fans in each zone of Unit 29 and Unit 30.
- Showers – Inmates in general population, such as Unit 30, may shower every day, and at any time throughout the day. Inmates in segregation units, such as certain zones in Unit 29, have scheduled times to shower three times per week. Even when inmates were in lockdown for their own safety following the disturbance in December 2019 and January 2020, inmates were provided the opportunity to shower. MSP is not presently on lockdown, and inmates are allowed to shower regularly.
- Telephone Privileges – Inmates in general population may use the telephone at any time throughout the day. Inmates in segregation units are permitted to leave their cell one hour per day, and they may use the phone during that period, or such close custody inmates may also use the telephone during the daily telephone call period, when officers transport a telephone around the unit to allow inmates to talk on the telephone for twenty to thirty

minutes each. Efforts are being made to repair any damaged or destroyed telephones in the segregation units.

- Recreation – Inmates at MSP are being provided full recreation privileges as much as possible given MSP’s COVID-19 measures. While in lockdown status, some inmate recreation was necessarily suspended. I recently instructed the wardens of each housing unit to ensure that they are allowing general population inmates to have recreation or “yard time” at least one hour per day, every day. I am not aware of any inmates being deprived of recreation for significant periods of time and certainly not weeks at a time.
- Medical Care – Substantial efforts are made to ensure that inmates are given the opportunity to submit sick call forms. I am not aware of credible reports of any inmates being forced to resort to lighting fires to get an officer’s attention in a medical emergency. My understanding is that MSP inmates’ access to medical care has significantly improved over the past five months. MSP’s third-party medical care provider has reported that the percentage of inmates making it to their medical appointments has increased substantially over the past five months.
- Mental Health Care – Prevention of suicides is very important to MDOC and MSP. I am not aware of any credible evidence that MDOC officers ignore inmates who threaten suicide. I am aware of substantial measures being taken by Commissioner Cain to improve MSP’s efforts to prevent suicides, including appointment of chaplains and inmate preachers, development of video conferencing for inmate visitation, improvement of food services, and creation of clubs and organizations and educational opportunities.
- Administrative Remedy Program – I am personally aware that substantial efforts are made to ensure that inmates are able to submit Administrative Remedy Program (“APR”) grievances. I am also aware of concerted efforts by MSP staff to ensure that the ARP process is meaningful and that credible inmate grievances are remedied. Contrary to reports from Plaintiffs, the ARP process is not “broken.”

11. I have personal knowledge of the locations where inmates are housed in at MSP, including the named Plaintiffs in this action. Of the 33 named Plaintiffs in this action, only seven remain at MSP. Of those seven, only four submitted declarations of complaints related to their conditions of confinement. Those four inmates are housing in Unit 29, Building F; Unit 30, Building A; and Unit 30, Building B.

12. Twenty-four of the 33 named Plaintiffs were transferred from MSP as part of a random and broad policy of transferring inmates in order to close certain buildings in Unit 29 and improve officer-to-inmate ratios, thereby improving conditions of confinement and

protecting inmates from harm by other inmates. Contrary to statements made by Plaintiffs, no inmates were transferred because they were named Plaintiffs in this action. That was never even considered as part of the transfer process.

13. I have studied the Plaintiffs' Supplemental Emergency Motion and Memorandum, including the 20 specific items of relief requested by Plaintiffs Aric Johnson, Phillip Webster, Kuriaki Riley, and Justin James. I have personally observed and confirmed the following facts related to those 20 specific items of relief.

Plaintiff Aric Johnson (Unit 29, Building F, Zone A)

- Medical Treatment for High Blood Pressure – On July 6, 2020, I personally confirmed with MSP medical personnel, and by reviewing the medical records attached as an exhibit to Defendants' Response, that the allegation that Johnson "has not received timely and appropriate follow up care" is incorrect. Johnson had appointments with medical staff for his hypertension on March 14, 2019, January 1, 2020, February 5, 2020, March 10, 2020, and June 3, 2020, and his next scheduled appointment is in six months. Johnson only missed one appointment and that was because he refused medical treatment. Johnson signed a document attesting that he refused medical treatment on September 9, 2019. Johnson's blood pressure was checked by registered nurses on February 5, 2020, February 10, 2020, February 27, 2020, March 2, 2020, and March 9, 2020.
- Blood Pressure Medication – On July 6, 2020, I personally confirmed with MSP medical personnel, and by reviewing the medical records attached as an exhibit to Defendants' Response, that Johnson has been receiving his blood pressure medication on time. Johnson signed a document showing that he received his blood pressure medication on January 16, 2020, February 8, 2020, March 23, 2020, April 28, 2020, and June 3, 2020.
- Leaks/Roof – On July 6, 2020, I confirmed that there are no known leaks or avenues of water intrusion in Johnson's immediate living area. MDOC has devoted substantial resources and has undertaken extensive and continuing measures with respect to the roof and other areas of alleged water intrusion in Building F of Unit 29 since the beginning of 2020. The attached photographs and work orders show that the roof over Johnson's housing area has been repaired and does not leak. *See* Photographs and Construction Maintenance Worksheets for Unit 29, Building F, Zone A attached as Exhibit D. In addition, on July 6 as I was reviewing items that had been repaired, I spoke with Mr. Johnson about the alleged leaks, and he confirmed that the leaks had already been repaired.

- Electrical Wires – On July 6, 2020, I personally observed that there are currently no exposed electrical wires in any of the showers in Johnson’s zone. A light fixture in Johnson’s bathroom was destroyed, and it has been replaced. The attached photographs show that there are no exposed wires in the bathroom of Johnson’s zone. *See id.*
- Toilets, Sinks, and Urinals – On July 6, 2020, I personally observed that all of the toilets, sinks, and urinals in Johnson’s zone are in working order. Any toilets, sinks, and urinals that were broken have been repaired. *See id.*
- Air Conditioning – There is an operational heating unit in Johnson’s zone, but there is no “air conditioning” system. Instead, there are industrial-sized fans, which are routinely monitored by MDOC and repaired or replaced as necessary. I personally observed the fans in Johnson’s zone on July 6, 2020, and I found them to be in working order. In addition, MSP is adding additional fans to each housing unit, including Johnson’s.

Plaintiff Phillip Webster (Unit 29, Building F, Zone A)

- Rodents and Insects – On July 6, 2020, I confirmed that there is no visible rodent or insect infestation in Webster’s zone. MDOC employs a licensed pest control applicator who provides pest control services at MSP three days per week. Webster’s building is routinely treated for insects and rodents. *See* Pest Control Documents attached as Exhibit E. I am aware that Webster’s housing unit was treated on July 10, 2020.
- Leaks/Roof – On July 6, 2020, I confirmed that there are no known leaks or avenues of water intrusion in Webster’s immediate living area. The attached photographs show that the roof over Webster’s housing area has been repaired such that it does not leak. Ex. D.
- Air Conditioning – There is an operational heating unit in Webster’s zone, but there is no “air conditioning” system. Instead, there are industrial-sized fans, which are routinely monitored by MDOC and repaired or replaced as necessary. I personally observed the fans in Webster’s zone on July 6, 2020, and I found them to be in working order. In addition, MSP is adding more fans to Webster’s zone.
- Medical Treatment for Eyes – On July 6, 2020, I personally confirmed with MSP medical personnel, and by reviewing the medical records attached as an exhibit to Defendants’ Response, that Webster had an optometry exam on August 29, 2019. Webster was prescribed eye wash solution on August 30, 2019. Webster acknowledged receipt of the eye wash solution on August 31, 2019.

Plaintiff Kuriaki Riley (Unit 30, Building B, Zone A)

- Mental Health Treatment – On July 6, 2020, I personally confirmed with MSP medical personnel, and by reviewing the medical records attached as an exhibit to Defendants’ Response, that Riley’s allegations regarding his mental health treatments are false. Riley was admitted to the MSP hospital on May 11, 2020, because he had threatened to hang

himself. Riley was discharged on May 14, 2020. He was seen two days later, on May 16, 2020, by a psychiatric nurse practitioner. On May 18, he was seen again for a “Suicide Precautions Follow Up” appointment.

- Medical Treatment for High Blood Pressure – I personally confirmed with MSP medical personnel on July 6, 2020, and by reviewing the medical records attached as an exhibit to Defendants’ Response, that Riley saw a medical doctor for his high blood pressure on October 21, 2019, January 9, 2020, and April 7, 2020.
- Blood Pressure Medication – I personally confirmed with MSP medical personnel on July 6, 2020, and by reviewing the medical records attached as an exhibit to Defendants’ Response, that Riley’s blood pressure medication was refilled on January 14, 2020, February 6, 2020, February 25, 2020, March 21, 2020, April 28, 2020, May 14, 2020, and May 19, 2020.
- Drinking Water – I personally confirmed that the most recent potable water test results for MSP show its water is within acceptable standards. To my knowledge, no recent test, including those performed by Plaintiffs’ experts, has found the existence of any harmful contaminants in MSP’s water system.

Plaintiff Justin James (Unit 30, Building A, Zone B)

- Rodents and Insects – I confirmed on July 6, 2020, that there is no visible rodent or insect infestation in James’ zone. MDOC employs a licensed pest control applicator who provides pest control services at MSP three days a week. Webster’s building was treated for insects on March 24, 2020, April 7, 2020, April 21, 2020, May 18, 2020, and June 15, 2020 as a matter of routine pest control procedures. *See* Ex. E. James’ zone received a pest control treatment on July 10, 2020.
- Leaks/Roof – On July 6, 2020, I confirmed that there are no known leaks or avenues of water intrusion in James’ immediate living area. I am aware that MDOC has repaired the leaks in Unit 30’s roof. *See* Photographs and Construction Maintenance Worksheets for Unit 30 Roof Repairs attached as Exhibit F.
- Mold in Shower – I confirmed on July 6, 2020 that there is no mold in the shower in James’ zone. I am aware of no test, investigation, or study that has ever confirmed the existence of mold anywhere at MSP. MDOC hired an independent contractor to test air quality, which includes testing for mold, and he will be on site at MSP on July 15, 2020.
- Air Conditioning – There is an operational heating unit in James’ zone, but there is no “air conditioning” system. Instead, there are industrial-sized fans, which are routinely monitored by MDOC and repaired or replaced as necessary. Additional, new industrial-sized fans are being installed James’ zone.
- Recreation – Since the institutional lockdown caused by inmate violence was lifted, all inmates in James’ zone, including James, have been routinely provided access to outdoor

recreation for approximately one hour per day. I have recently instructed all wardens to ensure that they permit inmates in general population, such as James, to have at least one hour of recreation or yard time every day. In the last few months, some inmate privileges have been temporarily and intermittently suspended as a result of the precautions necessitated by COVID-19, but I am not aware of any inmates being deprived of all recreation for a significant period of time. Records show that James had yard call on June 10, 2020, June 12, 2020, June 30, 2020, and July 1, 2020, among other days. *See* Unit Register and Yard Call Documentation attached as Exhibit G.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Dated: July 13, 2020.

Respectfully submitted,

Jeworski Mallett
